

Prepared factor + solve: five independent process runs

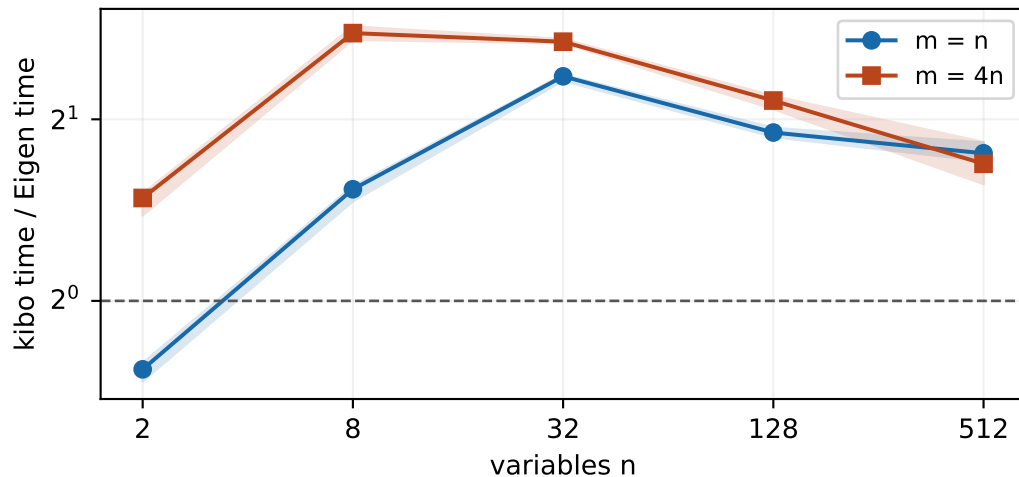

Windows MSVC: default Eigen SIMD
normal-LLT

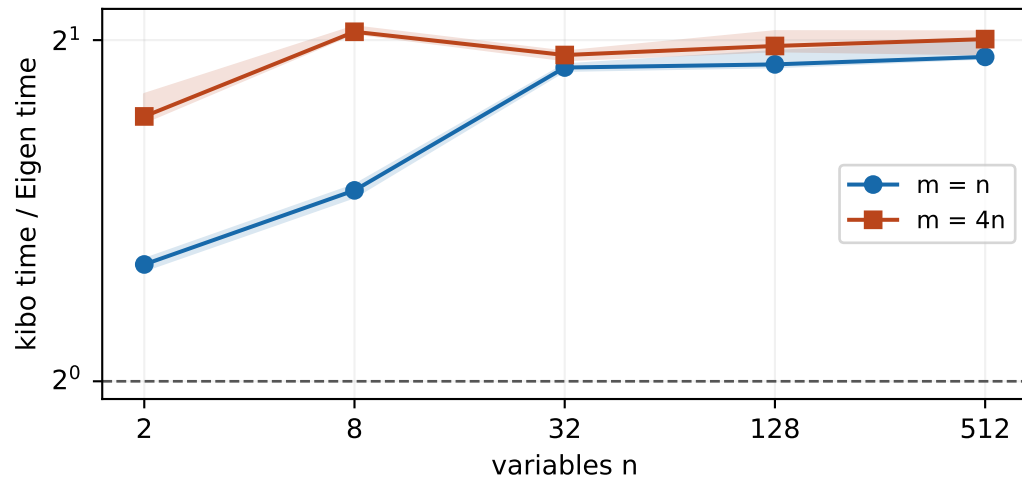

Linux Clang: both backends scalar
normal-LLT

Windows MSVC: default Eigen SIMD
augmented-QR

Linux Clang: both backends scalar
augmented-QR

Ratio > 1: kibo is slower. Shading: paired 95% bootstrap interval.
Each column compares its own backends; compiler/OS differ. Input assembly is excluded.
